

UBC Graduate Program in Neuroscience and Let's Talk Science are teaming up to bring the exciting field of neuroscience to Elementary and Middle School classrooms throughout the Vancouver Area! Volunteers will be visiting classrooms to present fun and exciting activities on the biology of neurons, brain lobes, and perform fun experiments to teach about the 5 senses in short 1 hour lessons. We'll also show students proper helmet fitting techniques to ensure everyone knows how to protect their brains. We're looking for volunteers to help facilitate these easy and fun activities. No previous experience required!

When: The week of March 27th – 31st (date and time depend on you, and your partnered teacher).
Training sessions will be held on March 22nd or March 23rd from 5 – 6 pm.

Volunteer Role:

- Attend one training session to learn the activities, find a partner, pick up your kits, and sign up for a school.
- Contact your teacher to find the best time and date for your visit.
- Visit the classroom and teach eager students about the coolest organ in the body... we're not biased...

Interested volunteers please contact ubcbaw@gmail.com to sign up. This activity will take as little as 2 hours from your week, is a one-time visit, and will help inspire a new generation of neuroscience enthusiasts!
